

# Orbot

# Help others bypass Censorship

1.

Would you like to help people in restrictive countries to bypass censorship?

2

It is possible, and you can do it in a very easy way with the Orbot app!

3

First, download and install the Orbot app from Google Play, Apple Store or F-Droid.

Google Play

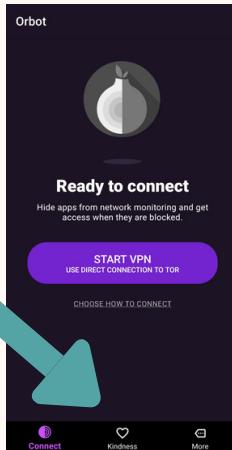

App Store

F-Droid

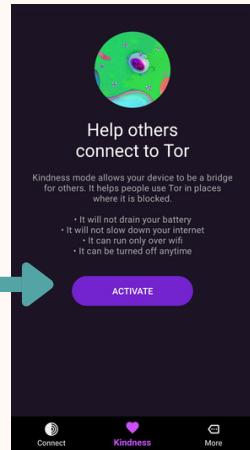

4

From the main screen, tap on the heart icon at the bottom.

5

Tap "Activate." Done! Now, other Tor users can connect to the Internet through your Snowflake proxy.

## IMPORTANT THINGS TO CONSIDER:

### Data:

You will be sharing your internet connection with users connecting to your device to bypass censorship, so be mindful of your data when it is activated.

### Battery:

While Kindness Mode is activated, Orbot will be running in the background which might reduce your battery life. Choose between:

- Only on Wifi
- Only when charging

### IP Address:

When you become a Snowflake proxy your real IP (linked to your physical location) will be shared with the Snowflake Broker (operated by the Tor Project) and it would also be visible to the entry node in the Tor Circuit.
